

NVOD is a remarkably innovative and modern training delivery system that provides Videotel videos, interactive CBT and courses across your ship's network. It allows crew to access training from multiple computers in multiple locations.

Training has never been easier!

A SMOOTH SAILING OPERATION

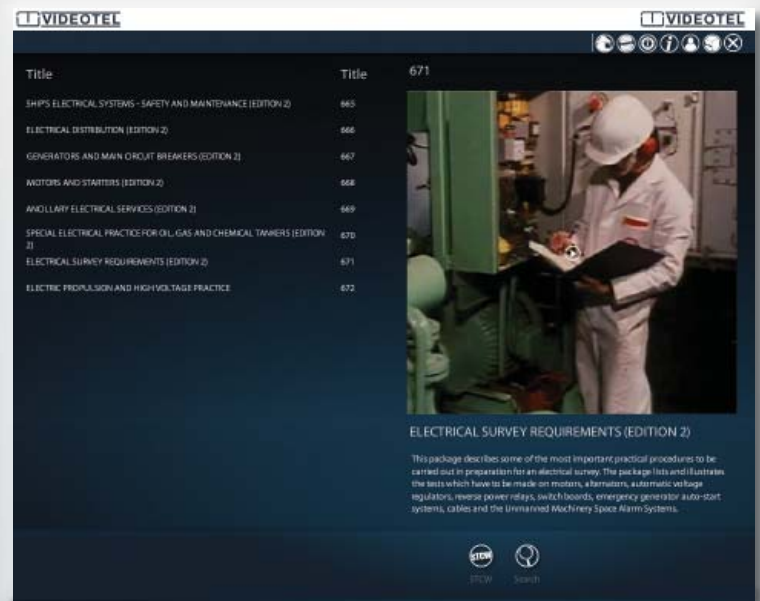

An NVOD server sits on your ship's network and is accessed through an NVOD browser on your ship's computers. From here you can select from any of the training titles in your package and start training. The system even allows for multiple users to train at the same time on different subjects.

THE MOST FLEXIBLE WAY OF TRAINING

Training no longer needs to be done on a single machine or on an allocated computer. Wherever you can access the ship's network you can access the NVOD server- including a laptop in your cabin!

THE MOST SECURE WAY OF TRAINING

The NVOD box can be kept on board in a secure location such as a locked cupboard. Not only does this prevent tampering but it keeps everything in one place neat and tidy.

Really simple to use training

View personal information, crew records and training activity

View a huge range of Videotel videos, interactive CBTs and courses

Browse and view specific titles by STCW functional areas or by keyword

Access different training across multiple training stations at the same time

Integrates with webFTA

Instant updates

Hides away with the server so no mess!

Ultimate security

Flexible, modern and easy training

The next generation of training is here!

RECORD TRAINING EFFICIENCY

All of the training carried out on NVOD is recorded in the OTM+ (Onboard Training Manager Plus) central database. These training records are held at a single point on the NVOD box, allowing easy back up, import and export to your on shore office.

As administrator, you can view OTM+ training records and schedules on NVOD for all crew members at any time.

View, generate and manage:

- **Personnel Records**
- **Crew Completion Records**
- **Crew Schedule Reports**
- **Certificate Reports**
- **Onboard Crew Training Lists & Reports**
- **Training Event Records & Reports**
- **Training Summary Reports**
- **Import & export NVOD data files and log records between your ship and shore office**

Individual seafarer's can view their own training careers too!

Continuing to meet your training needs

**IS NVOD FOR MY SHIP?**

NVOD serves high quality sound, video and graphic files to multiple computers so needs to run on a ship's network. That means only ships with an existing network on board can run NVOD.

We provide an NVOD server box that easily connects to an existing network on board your ship. The NVOD server is then accessed through an NVOD browser on your ship's computers. NVOD is a smooth and quick service of the most current Videotel training.

Training records remain located at a single point on the server, allowing easy back up, import and export.

Safe, simple and smooth.
